Select/Delete duplicate rows from EMP table

Write a query to select/delete duplicate rows from the EMP table

Answer:

We can achieve this by using the pseudo column ROWID.

```
select * from emp
where rowid not in
(
select min(rowid)
  from emp
  group by empno
);

delete from emp
where rowid not in
(
select min(rowid)
  from emp
  group by empno
);
```
